ABOUT PORCINI

Porcini (Boletus) is the most prized mushroom in Europe. Porcini is extremely rich in vitamins B12, B1, B2, B3, B5, C, D and minerals – potassium, iron, zinc, selenium, copper, calcium, beta-glucan. It strengthens immunity, regulates the cardiovascular system and prevents osteoporosis. It is especially recommended in vegetarian and vegan diets because it contains more protein than any other type of vegetable.

ABOUT CHANTERELLE

Dried chanterelle contains 3 times more beta carotene than carrots. Beta carotene (vitamin A) is a very strong antioxidant that protects our body from free radicals and has especially positive effect on the skin and eyes. Chanterelle is rich in vitamins C, B1 and B2, while in terms of minerals it contains potassium, calcium, iron and zinc, magnesium and phosphorus.

Dried Black Trumpet Class I
Dried Black Trumpet Class II
Dried Black Trumpet – Finely Chopped
Dried Black Trumpet Powder

ABOUT BLACK TRUMPET

The Black Trumpet Mushroom was named after its appearance, which really resembles a trumpet. It has a significant amount of D vitamin complex, especially D2 and D3, which significantly contributes to better functioning of the organism. It regulates blood sugar levels and contains natural insulin and enzymes that help “break down” blood sugar. It positively affects the functioning of liver and pancreas.
